

PROGRESSIVE MEDICAL

PTFE COATED LAPROSCOPIC ELECTRODES

Progressing Speed

Progressive Tips are coated with pure PTFE, creating a non-stick surface that resists eschar build-up during electrosurgery. Electrode cleaning takes up significant procedural time in both open and laparoscopic settings. PMI makes surgery faster.

Progressing Safety

Limited eschar build-up allows surgeons to use the lowest possible energy settings, avoiding any unnecessary heat application to targeted tissue. Modified Blade and Needle Electrodes limit unintended alternate site injuries. PMI makes surgery safer.

Progressing Surgical Outcomes

The strength of the PMI Chemical Bond ensures the coating does not degrade under high heat. Energy is released evenly across the electrode, producing consistent healing patterns. PMI improves surgical outcomes.

LAPAROSCOPIC WIRE L-HOOK 33cm P0100

LAPAROSCOPIC STANDARD BLADE 33cm P0017

LAPAROSCOPIC SPATULA 33cm P0018

LAPAROSCOPIC CURVED BLADE 33cm P0019

LAPAROSCOPIC L-HOOK 33cm P0020

LAPAROSCOPIC J-HOOK 33cm P0021

LAPAROSCOPIC NEEDLE 33cm P0022

LAPAROSCOPIC THIN CURVE SPATULA 33cm P0027

STANDARD STEM
HAND ACTIVATED

SPLIT SYSTEM (S)
FOR FOOT CONTROL CORD USE
